

Amendments To The Claims
(In The Revised Format)

The listing of claims presented below will replace all prior versions, and listings, of claims in the application.

Listing of claims:

1. (currently amended) A liquid crystal display having a signal line in panel for driving gate driver IC, comprising:

a gate driving power supply unit for supplying analog signals;

~~a control circuit unit for applying control signal to analog signal
outputted from the gate driving power supply unit;~~

a correction circuit unit for transforming the ~~applying control signal~~
~~from the control circuit unit to correct~~ analog signal outputted from the
gate driving power supply unit into a saw-tooth type signal; ~~saw type~~;
and

a control circuit unit for controlling the turn-on/off operation of the
correction circuit unit; and

a corrected power supply unit for supplying ~~saw type~~ saw-tooth
type signals corrected in the correction circuit unit to the gate driver IC.

2. (original) The liquid crystal display according to claim 1, wherein the saw type signal has the same cycle as the gate pulse width.

3-6. (cancelled)
